Aurora, CO 720-882-3256 name6562@colorado.edu

Computer Science student skilled in C++, Python, and collaborative software development. Passionate about building efficient, user-focused solutions through innovation and teamwork.

EDUCATION

University of Colorado Boulder

Expected May 2028

Bachelor of Science in Computer Science

GPA: 3.48 / 4.00

Relevant Coursework: Data Structures, Discrete Structures, Computer Systems, Software Development, Databases

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, SQL, HTML/CSS

Tools: Git/GitHub, Node.js, Docker, VS Code, Microsoft 365, MySQL

Concepts: OOP, Data Structures, Algorithms, Databases, Software Engineering, CompTIA ITF+

EXPERIENCE

STEM Intern, Project: Return To Work Inc. (R2W)

Jun – Aug 2025

- Designed documentation workflows in Microsoft 365, improving clarity and accuracy across 2–3 weekly reports.
- Supported outreach campaigns that increased LinkedIn engagement by 20%.
- Collaborated across 2-3 departments to streamline project tracking and ensure on-time deliverables.

Lead Retail Store Operations Associate, Big Lots

Sep 2023 – Jun 2024

- Guided team efforts to deliver efficient customer service and checkout support, improving satisfaction and repeat visits, while getting 20% of new customers to sign up for the rewards program per month.
- Managed inventory and restocking, reducing out-of-stock items by 15%.
- Led seasonal display setups that boosted featured product sales and store traffic throughout all 4 seasons.
- Optimized backroom layout, cutting restock time by 10% and improving workflow efficiency.

PROJECTS

The Lion King Board Game (C++) — Built a 500+ line turn-based OOP game using arrays and file I/O to manage player state and gameplay; added save/load features for persistence.

Fall Detector App (Python) — Created a motion-sensor prototype analyzing data to detect falls and send alerts; tested with simulated inputs to verify accuracy. (CABPES JETS Program)

LEADERSHIP

Soccer Referee, Soccer City Aurora — Officiated weekly matches for K–5 students across 10+ Denver/Aurora schools, fostering inclusion and mentoring youth on teamwork.

Church Youth Leader, Jubilee Evangelical Church — Led weekly lessons for 20+ youth, organized drives, and coordinated volunteer events promoting leadership and service.

ACTIVITIES

CABPES — Student participant in an after-school STEM program to improve technical and problem solving skills among underrepresented youth. Also participated in impactful engineering projects. (Fall Detector App)

NSBE Member — Participated in technical workshops and professional networking.

HackCU 11 Participant — Collaborated in Colorado's largest collegiate hackathon, developing a 24-hour prototype to address real-world challenges through rapid design, coding, and teamwork under tight deadlines.

Volunteer: Youth Roots, Food Bank of the Rockies, A Precious Child, and community outreach events.

HONORS & INTERESTS

Dean's List (Fall 2024, Spring 2025), CABPES JETS Award (2023)
